

How to build

This project was made with JetBrains CLION 2019.3.4

And use C++20.

Use CLION :

Work with visual studio or MinGW toolchains.

- * Open the project

- * Build the project

F1sim.exe has been build in cmake-build folder

Other way :

Need :

- CMAKE VERSION > 3.15

- Visual studio 2019

- MSVC v142 - VS 2019 C++ x64/x86 Build Tools

- Kit SDK Windows 10 (10.0.18362.0)

- * Use the ``cmake .`` command in the folder to compile the project

- * Open F1sim.sln

- * Then generate F1sim

F1sim.exe has been build in Debug folder or Release folder , it depend on which one you choosed.
